PROFESSIONAL SUMMARY

Full Stack Web Developer with 2.5+ years of experience working on live, production-level web applications. Skilled in ReactJS, TypeScript, Node.js, Express.js, MongoDB, and MySQL. Experienced in deployment, API development, and collaborative tools. Passionate about learning new technologies and building scalable, user-focused solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, HTML5, CSS3, Chakra UI

Backend: Node.js, Nest, Express.js, REST APIs, Websockets

Authentication: Firebase, JWT, Google OAuth

Payments: Stripe

Database: MySQL, MongoDB, PostgreSQL

Deployment & Cloud: Firebase, Vercel, Render, Netlify

Developer Tools: Git, GitHub, Jira, ClickUp, Stripe, Cron Jobs

AI Tools: Codex, Google AI Studio

Other: Cron Jobs, Cloudinary, Pusher, Gemini AI

PROFESSIONAL EXPERIENCE

Full Stack Developer | *FlexTeam*

Jul-2024 - Jun 2026

- Worked as a Full Stack Developer on production-level web applications.
- Collaborated with product managers, designers, and backend developers to deliver new features.
- Developed reusable frontend components and scalable backend services.
- Wrote clean, maintainable, and optimized code following industry best practices.
- Participated in requirement analysis, sprint planning, code reviews, debugging, and production deployments.
- Managed API integrations, database operations, and third-party services.
- Worked with Git, Jira, and ClickUp in an Agile development environment.

Key Project – MadChef (Live Project)

- Developed restaurant menu management, inventory, and billing features using React.js and TypeScript.
- Managed application state using React Redux.
- Integrated Stripe Payment Gateway for subscription and payment processing.
- Developed REST APIs and optimized MySQL database queries.
- Implemented Cron Jobs for scheduled automation.
- Improved application performance and resolved production issues.

Full Stack Intern | *FlexTeam*

Jan 2024 – Jun 2024

- Worked closely with senior developers to understand production-level development workflows.
- Developed frontend and backend modules under the guidance of experienced developers.
- Learned software development best practices including Git workflow, API integration, and database design.
- Participated in debugging, testing, and feature implementation.

Key Project – Purchr – Chrome Extension (Live Project)

- Developed and maintained a Chrome extension that monitors product prices across multiple e-commerce platforms.
- Implemented price tracking and real-time notifications based on users' target prices.
- Improved extension performance and user experience through reusable React components.

ReactJS Intern | *ProjectTree*

Jul 2023 – Aug 2023

- Completed a ReactJS internship focused on frontend development.
- Developed a static expense management web application named **CashFlowCanvas** using React.js and Bootstrap.
- Built responsive and user-friendly UI components while strengthening React fundamentals.

FEATURED PROJECTS

UdyogBill – Textile Industry Invoice Management System

- Developed a full-stack billing and inventory management system for manufacturers and wholesalers using **Next.js, NestJS, and MongoDB**.
- Implemented **Firebase Authentication**, inventory management, and billing functionalities with a responsive user interface.
- Integrated **Gemini AI** for invoice generation, **Cloudinary** for image uploads, and **SMTP** for OTP and email notifications.
- Built scalable REST APIs and optimized application performance for efficient business operations.

PragatiDesk – Employee Productivity & Task Management System

- Developed a role-based employee productivity and task management web application for Admins, Team Leaders, and Employees.
- Built using **React.js, Vite, Node.js, Express.js, MongoDB, Tailwind CSS, and JWT Authentication**.
- Implemented ticket management, task assignment, employee performance tracking, and real-time notifications using **Pusher**.
- Integrated **Cloudinary** for avatar uploads and **Nodemailer** for email notifications.
- Designed responsive dashboards with role-based access for Admins, Team Leaders, and Employees.

SwiftCart – E-commerce Website

- Developed a full-stack e-commerce shopping cart application using **React.js, Node.js, Express.js, MongoDB, and Chakra UI**.
- Implemented product browsing, category filtering, shopping cart, wishlist, and user account management features.
- Integrated **JWT authentication, Google Sign-In**, password reset via **Nodemailer**, and **Stripe Checkout** for secure online payments.
- Built responsive user interfaces and developed REST APIs for product, order, cart, and payment management.

ZeeCare – Doctor Appointment Management System

- Developed a full-stack hospital management application using **React.js, Node.js, Express.js, MongoDB, and Chakra UI**.
- Implemented patient registration, doctor management, appointment booking, and admin dashboard functionalities.
- Integrated **JWT Authentication, Google Sign-In, Stripe Payment Gateway, Cloudinary**, and **Nodemailer** for secure authentication, online payments, image uploads, and email notifications.
- Developed REST APIs and built responsive user interfaces for patients, doctors, and administrators.

EDUCATION

Bachelor of Computer Engineering, Sarvajani College of Engineering & Technology(SCET) **Aug 2020 – Jul 2024**
Surat, Gujarat, India

ADDITIONAL

Languages: English, Hindi, Gujarati

Interests: Traveling, Designing & Editing in Canva, Exploring New Technologies
